

# Electrical Engineers in Houston, Texas

Find employers to investigate.  
Then research the place around them.

This example organizes public employer filings by profession and reported work location. It is a starting point for your own research, not a job offer or a list of companies currently hiring.

**114**

Employers in the  
certified-filings scope

**49**

Employers with  
new-employment filings

**80**

New-employment positions  
requested

## Read the evidence carefully

A certified Labor Condition Application does not establish that someone was hired, entered the United States, received a visa, or that the position remains open. New employment is a filing category, not proof of recruitment from abroad.

The following pages contain 40 employer entries from the report snapshot. The summary above covers the complete scope. Reported employer headquarters can differ from the Houston worksite.

Snapshot: 10 Sep 2026. Summary rechecked against the local product database on 14 Sep 2026. Research window unchanged.

# Know what you are buying

## Scope and dates

Electrical Engineers; reported work location Houston, Texas. Certified decisions from 01 Jul 2025 through 30 Jun 2026. Employer table uses the new-employment field. Extensions, transfers and changes of status are not included in the requested-position count.

## Salary and matching limits

Annual-salary medians exclude hourly and monthly records. Missing values stay unavailable. Employer names are normalized for the historical approval cross-check; entity changes and imperfect name matches are possible. Multi-worksite filings can appear in more than one location.

## What to do next

Verify each company on its current careers website. Read the role requirements and work-authorization language. Explore rent and local conditions separately; their sources and periods vary by destination.
